PARTNER LETTER

Many of our clients are aware that we have an entire department dedicated to research, but you may be wondering what that translates into for our clients. Our Head Researcher Austin has been with us since May and has greatly improved our processes for collecting information and relaying it to clients. We constantly review how we can help our clients better achieve their objectives; keeping the most up to date information in front of our clients. If you are one of our subscription clients and wanted to know in-depth information for your project, let us know what you need; it's part of your subscription!

BC CLIENT TRIP

Anna and Grant have returned from their whirlwind trip around BC. We are happy to announce that the trip was a great success, fostering new relationships with exciting new partners and revitalizing relationships with current clients. We truly believe there is no better way to understand an organization's goals than to visit the communities and experience first hand the unique challenges and opportunities of each and every one of our clients. While all good things must come to an end, we are refreshed, inspired and happy to be back in the office working full-time helping our clients achieve their goals.

Halalt First Nation Beaches on Vancouver Island.

Partner Grant Barley and Duane Manuel from Neskonlith First Nation on a tour of Neskonlith's Land.

KEY DATES

August 1: Anna & Grant Return from the Island

After three weeks on the road visiting communities and meeting with clients, Anna and Grant are back in the office!

PROFILE: CHU CHO ENVIRONMENTAL

For our first Client Profile, it makes sense to highlight one of our first clients, Chu Cho Environmental. Chu Cho Environmental is a First Nations culturally based environmental consulting company that is fully owned by the Tsay Keh Dene Nation. Under the management of GM Mike Tilson, Chu Cho Environmental operates within the framework of TKD's Economic Development Corporation.

Chu Cho Environmental offers an extensive portfolio of environmental consulting services to anyone working throughout Northern British Columbia. These services vary from Air and Water Quality Monitoring, to Big Data Management, to First Nations Traditional Use Studies, to Habitat Reclamation and Restoration Monitoring and more.

Some recent projects for Chu Cho Environmental have included conducting, monitoring and assessing numerous dust mitigation studies related to the Williston Reservoir and Water Quality Studies in the Tsay Keh Dene Territory. Chu Cho Environmental ensures the highest of data quality while maintaining a well-trained and highly efficient team.

We are proud to have Chu Cho Environmental partner with Strategies North to help them achieve and implement their goals.

Visit www.chuchoenvironmental.com to learn more.
